Most challenging cases in paediatric oncology

Speaker Profile

14 February 2024 ALK-positive histiocytosis, a recently described rare subtype of histiocytosis

Speaker: Delfien Bogaert (Belgium)

I am a pediatric hematologist-oncologist from Ghent, Belgium. I graduated medical school in 2013, after which I specialized in pediatric medicine (2013-2020) and did a PhD in primary immunodeficiencies (2013-2017). From 2020 to 2022, I did a fellowship in pediatric hematology-oncology during which I worked one year at the Princess Maxima Center in Utrecht, The Netherlands. Since November 2022, I am working as a pediatric hematologist-oncologist in Ghent University Hospital, Belgium.
