Most challenging cases in paediatric oncology

## Speaker Profile

22 May 2024

**An infant SHH medulloblastoma with MYCN amplification showing early and aggressive relapse despite high intensity treatment**

**Speaker: Beatriz Cofreces Pérez (UK)**

Beatriz Cofreces Pérez trained as a paediatrician at Reina Sofía Hospital (Córdoba, Spain), during which she developed an interest in Oncology and Haematology, dedicating the last year of her training to focus on that speciality. This included a 3-month stay at the Haemato-Oncology Unit in Niño Jesús Hospital in Madrid. Afterwards she worked as a Clinical Fellow for three years at Great Ormond Street Hospital in London, where she gained more experience in Haematology, Oncology and Bone Marrow Transplant. Currently she is working as a consultant at Teresa Herrera Hospital in A Coruña, Spain. She relishes in the constant development of this speciality and hopes to enjoy a long career in Paediatric Haematology and Oncology. She is interested in cancer education and is actively involved in teaching and training of medical students, and paediatric and oncology trainees.
